STEBAN Holdings Ltd with its bespoke team of accomplished financial advisors spanning decades within the industry, advisory to major corporate clients throughout the world on capital wealth building.

We provide unique investment opportunities with Banking along with private financial institutions to build portfolios with maximum security provided in combination with Tax and legal advice.

Our financial team looks at all aspects of risk management that are important to our clients before providing any recommendations.

Insurance & Risk Management

In order to stay at the forefront of investor protection and risk management, STEBAN through its fund management providers has coordinated the placement of a Financial Offering Insurance Policy (FOI) which provides an indemnity for our client's trading investments. In the event of any actual or alleged errors, misstatements, misleading statements, neglect or breach of duty in connection with the Loan Note issued by Rosberg Incubator Diversified Fund.

The FOI policy sum insured runs at a 100% ratio of capital deployed and for the full 5-year ETN term. The FOI policy has been arranged by the regulated Lloyd's of London Insurance Broker EC3 Brokers Limited. The lead insurer providing capacity to the total FOI insurance program is Allianz SE. Allianz Insurance is one of the largest general insurers in the UK and part of the global Allianz Group.

Allianz Group employs 147,000 employees worldwide and serves 100M customers across more than 70 countries. Global gross written premium totaled EUR 906 billion in 2019. Rating S&P AA - Moody's Aa3 - A.M. Best A+. The preservation and protection of investor capital sits permanently at the core of our trading methodology and strategy.

When building a successful portfolio.

Profits can be generated by minimizing exposure to risk by buying and selling discounted prime securities through a well-known method called arbitrage which utilizes arrangements to place buyers under contract at predetermined prices.

The regulated trade partners to which we have access either directly or indirectly trade discounted prime securities using a pre-sold Arbitrage strategy. Arbitrage utilizes arrangements to place buyers under contract at predetermined prices.

This means that we as a licensed trader, cannot purchase a security unless a buyer and price have already been agreed and contracted. These funds a mentally removes speculation from a transaction and consequently protect principal investment capital.

By exploiting the difference in the buying and selling price, pre-determines the generation of profit.

Our regulated trade partners perform these Arbitrage led trades at sufficient volume and frequency to enable a regular and high profit yield. This enables STEBAN to subsequently provide our investors with a low risk, high yield return of around 13.25% per annum.

Management Fund

STEBAN management maximization of funds is made with our partnership with established financial organizations in conjunction with a reputation for exceptional service and discretion. We leverage our long-standing relationships with leading global providers of investment products, structures, vehicles, and trading opportunities to the benefit of our investors.

Investment Summary

STEBAN has been established based on expert, financial analysis and the subsequent opportunity identified to offer investors access to high yield, regulated investment products, which can be extremely exclusive due to their demanding entry requirements.

Open to investors who are seeking a higher-than-average yield to other investments in the market.

Investment returns.

- Minimum Investment 500,000 GBP
- Investment time 12 month
- Profit pay-out every 6th month
- Invested capital and promised returns are reinsured
- Reached return last years was around 13.25% annually

Bio Cellulose

STEBAN Holdings Ltd working with Bio cellulose (**or microbial cellulose**) which is a natural fibre with a diameter of only 20 nanometres – 1000 times thinner than human hair. This superfine fibre is an eco-friendly, biodegradable alternative to fibres produced through commercial manufacturing process. We work with Bio Polymers which is wood based and biological degradable and replace plastic polymers.

Solar Panels

STEBAN Holdings Ltd working with manufacturing and distribution of Solar Panels used for electrical power and heating. When the sun shines onto a solar panel, **energy from the sunlight is absorbed by the PV cells in the panel**. This energy creates electrical charges that move in response to an internal electrical field in the cell, causing electricity to flow.

Hydrogen

STEBAN Holdings Ltd working with development and production of hydrogen for vehicles and storage of energy. Hydrogen is **the lightest element**. At standard conditions hydrogen is a gas of diatomic molecules having the formula H_2 . It is colorless, odorless, tasteless, non-toxic, and highly combustible. Hydrogen is the most abundant chemical substance in the universe, constituting roughly 75% of all normal matter.
